

Technical Data Coordinator

Clear Angle Studios LTD - Surrey

Job Overview

Clear Angle Studios is a company based in Pinewood Studios which covers all aspects of scanning for VFX, from full 360° character scanning in its multi camera systems, LiDAR scanning of sets and environments to high resolution multi bracketed texture acquisition.

As a Technical Data Coordinator you would join the close knit, but rapidly expanding data team, assisting all other departments in their continued successful performance by ensuring that our meticulous data standards and organisational structure are upheld and maintained.

In order to continue to place our client's needs at the forefront of our operation, it is essential to be able to rely on the quality and accuracy of our data. Your role will be to ensure that data is checked, sorted (and corrected if necessary) and situated correctly within our pipelines across individual workstations, networks and server solutions alike.

As an integral part of the Clear Angle team the successful candidate would have the opportunity to regularly interact and communicate with every facet of the business, helping to facilitate collaboration between processing teams and capture teams alike.

As a growing company in an extremely fast paced and results oriented film & TV industry landscape, you'll be accustomed to working to tight deadlines, communicating effectively and comfortable with the responsibility of your teammates relying on you.

Key Responsibilities and Duties

- Ingestion of data from multiple sources (physical drive, internet based) to Clear Angle server pipeline
- Ensuring continued operation of pipeline by moving data to designated location and clearing space ahead of time for future use
- Production and accurate record keeping of physical archive data (tape storage)
- Flagging issues and assisting with problem resolution by working closely with IT department if required
- Working collaboratively with other departments to aid in the completion of projects on time, to a high standard

Other Responsibilities

- Aiding in research and decision making for future expansions and network/hardware strategy based on experiences and data collected
- Assistance in development of scripts and automated solutions for common problems or to aid in overall efficiency
- Assistance in developing and implementing a large scale database solution to manage all data assets across the company.
